

## IMPORTANT SAFETY RECALL NOTICE

Dear Suzuki Owner:

This notice is being sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

Suzuki Motor Corporation has decided that a defect which relates to motor vehicle safety exists in certain 2004 Suzuki Forenza and 2004 Suzuki Verona vehicles. According to our records, you own one of the vehicles affected by this recall.

Affected vehicles have a brake light switch that may become misadjusted if an upward/rearward force is applied to the brake pedal. This condition could occur if your foot slips off the brake pedal or if you pull up on the brake pedal with the top of your foot. If this should occur, the brake light switch will not function properly, causing the brake lights, including the high mounted stop lamp, to remain illuminated continuously without brake pedal application, with the ignition switch in the on or off position. If the brake lights remain on continuously while driving, a following driver may not know when your brakes have been applied, and a rear-end crash could occur without prior warning. This condition may also discharge the vehicle's battery, and, the Automatic Transmission Torque Converter Clutch, Cruise Control and Traction Control System, if equipped, will become disabled.

To correct the above problem, your Suzuki dealer will replace the brake light switch on your vehicle at no cost to you for parts or labor. If you must drive your vehicle before having the recall repair performed, be careful not to let your foot slip off the brake pedal and not to pull up on the brake pedal with the top of your foot.
